

Dependable Spill Storage Shed

Product Images

Description

The Dependable Spill Storage Shed is rigid and double walled, guaranteeing optimum protection for contents. The Spill Storage Shed is chemical resistant and weathertight, ensuring shed contents are stored safely even in precarious weather conditions

- Constructs a sturdy compact unit around the spill pallet
- Pre-assembled, no tools required
- Extremely sturdy: rigid and double walled
- Chemical resistant and weathertight PE hardcover ensure protection of spill pallets
- Ideal for the easy storage of chemicals, drum dispensing and for hazardous waste collection
- 2 side panels, both with 2 storage compartments each
- Accessible from either side
- Tall headspace allows use of rotary pump equipment and conical funnels without and restrictions to workspace
- Forklift can be used on both sides, whilst empty
- 4 recessed external side pockets allows for unit to be bolted to ground
- Can be padlocked (a long shackled–type, 80mm vertical clearance recommended)
