

Cofra Goya Safety Boots

Product Images

Description

The Cofra Goya Safety Boot is a high quality and water-repellent safety boot. The Goya Safety Boot is 100% metal-free, ensuring increased comfort to the wearer

- Upper lining made from nubuck leather, ensuring water repellence
- Breathable, external lining
- Internal lining is made from 100% polyamide fabric. This breathable fabric allows for the easy absorption and release of moisture
- Abrasion resistant, and antibacterial properties
- Foot-bed: EVANIT-EVA and nitrile special compound to sole gives the boot a high bearing capacity and variable thickness for increased comfort
- Sole: Polyurethane/TPU
- Arch support made of poly-carbonate and fibreglass provides addition support and protection to the wearer
- Mid sole: non-metallic APT Plate. Flexible and lighter than traditional steel mid soles, the APT plate ensures increased comfort to the wearer
- Width: 11 Mondopoint
- Toe cap: non-metallic, TPU toe cap protection. Composite toe cap resistant to 200 Joules
- S3 CI SRC
- Conforms to EN ISO 20345
