

North Strongotherm Terry Gloves

Product Images

Description

North's Strongotherm Brown Gloves are designed for handling warm parts in glass industries. These thermal protection gloves have been made to withstand contact temperatures up to 100°C. Maximum comfort and added sturdiness are ensured with the Strongotherm Brown gloves as the knitting technique used in the formulation of the gloves help to obtain a glove that fits snugly to the hand, with good dexterity and ribbed at the wrist for added safety
