

Pelstat Conductive Grid Tape

Product Images

Description

- Special polypropylene tape, layered with anti-static, anti-sparking surface on the inside and the outside of the tape
- Conductive grids are embedded between the two anti-static layers preventing any shedding, flaking, cracking or chipping of the grids
- Provides static shielding as well as preventing static build-up
- Available in 1/2", 3/4" and 1" widths
- Conforms to IEC 61340-5
