

Presto Screw Extractors

Product Images

Description

The Presto Screw Extractors are mainly used for removing broken or seized screws. The Screw Extractors are left-handed for use on right-handed threads

- Presto Screw Extractor Set
- Left-handed for use on right-handed threads
- Screw drilled out to the proper diameter for the extractor
- Extractor then is inserted into hole and turned counter-clockwise using a tap-wrench
- While extractor is turned the flutes on the tool dig into the screw which causes it to tightly lock
