

Aim-TTi TSX-P Series High Current Power Supplies with Interface

Product Images

Description

The Aim-TTi TSX-P High Current Power Supply Units contain all the features of the TSX series, along with a number of easy to use keyboard functions, with total remote programmability. The TSX-P High Current Power Supply Units with Interface boasts a third display for clarity of information and safety

- Compact and lightweight high power units
- Fan-free operation - no additional noise in the bench environment
- Fully variable OVP trip to protect against regulator failure
- 35V-10A and 18V-20A models
- Bench or rack mounting
- High setting resolution, remote sense terminals
- Linear post regulation for unrivalled performance
- All models can operate in both constant voltage and constant current modes, with automatic crossover and automatic mode indication

Additional features of the TSX-P models:

- Keyboard setting of all parameters
- Rotary and delta (step) control of V and I
- Watt display, storage of 25 settings
