

Superior Half Finger Glove Liners

Product Images

Description

The Superior Half Finger Glove Liners have been developed from 100% polyester material, meaning they are extremely durable and capable of standing up to rugged usage. These ambidextrous glove liners act as a buffer between the outer glove and the wearer's skin, providing maximum absorbency and protection against invasive liquids

- 100% polyester material
- Ambidextrous glove liner
- Acts as a buffer between outer glove and skin
- Excellent sweat/moisture absorbency
- Can be laundered and re-used
- Colour-coded cuffs for easy identification
- Ideally suited to critical cleanroom environments
