

Elten Sander Safety Boots

Product Images

Description

The Elten Sander Safety Boots are ESD-safe and suitable for working in areas subject to electrostatic discharge and in electrostatic protected areas (EPA). Made from water-repellent, Hydrophobized Cordura® material, the Sander Safety Boots offer improved resistance against water penetration and absorption. With a modern and sporty design, the Sander Safety Boots feature a fully padded tongue to provide exceptional wearing comfort and prevent painful pressure points. Featuring a non-metallic, penetration-resistant midsole the Elten Sander Safety Boots are the ideal footwear for all working environments

- Modern & sporty design with softly padded lining provides good stability and firm support
