

Product Family Honeywell Disposable Face Shield

The Honeywell Disposable Face Shield is designed for healthcare and social care workers and is intended for use in situations where social distancing isn't feasible and in areas with high risk of community disease spread. The disposable face shield complies with European regulations for splash and droplets, and offers enhanced protection against the transmission of droplets in the air. Unlike DIY (do it yourself) solutions, this face shield provides an anti-fog coating to reduce moisture build-up and avoid low visibility and hazing.
